t: 1 (415) 298-9809 e: jtwnguyen@ucdavis.edu l: San Francisco, California [Portfolio](#) | [Linkedin](#) | [GitHub](#)

Skills

React.js, Redux, JavaScript, HTML5, CSS3, Ruby, Ruby on Rails, jQuery, SQL, postgresSQL, Canvas, AWS, Heroku, Webpack

Projects

JimmyJams

[live site](#) | [github](#)

JavaScript , React / Redux , Ruby on Rails , postgresSQL , Jbuilder, CSS3 , AWS S3 , Heroku , Webpack

JimmyJams is a full stack replica of the popular online audio distribution platform, SoundCloud, that uses Ruby, Ruby on Rails for the backend and Javascript, React with Redux for the frontend.

- Implemented fully functional user authentication that utilizes BCrypt salts for better security
- Developed Song CRUD that employs AWS Active Storage

RunEscape

[live site](#) | [github](#)

MongoDB , Express, React , Node.js , HTML5 , Canvas API , JavaScript , CSS3 ,Socket.io, Webpack

RunEscape is a score-based, 2-d multiplayer endless runner game in which players compete against one another and accrue points by avoiding obstacles.

- Integrated animation of monsters through Canvas API
- Established game logic for character movements (ie. running, jumping, double jumping, air dashing)

JimmyJumps

[live site](#) | [github](#)

HTML5 , Canvas API , JavaScript , CSS3

JimmyJumps is an infinite platform jumper game that utilizes Javascript, HTML5, and Canvas.

- Implemented collision-detection through subsequent movement based on player's position and velocity
- Developed a smooth free-range player movement and directional animations

Experience

Capital Servicing Specialist | April 2018 - February 2019

Accounting Principals, at Square Inc -- San Francisco, CA
